Design Conclave -

Design Conclave is a competitive, hands-on CAD modeling event designed to evaluate participants' **speed, creativity, technical accuracy, and practical design thinking**. The event progresses from rapid concept modeling to detailed design planning and finally to real-world fabrication, closely simulating an industry-style product development workflow.

Participants will work under time constraints and problem-based challenges that test their ability to convert ideas into functional designs using CAD tools and physical fabrication techniques.

Event Structure

- **Phase 1 – Round 1: Speed Modelling**
  - Participants must create a given 3D CAD model within a limited time and calculate the mass using the assigned material.
  - This round is individual, and only one member from each team is allowed to participate.

- **Phase 2 – Round 2: Design Modelling**
  - A common, more complicated design will be provided, and participants must model it accurately and determine its mass.
  - This round focuses on precision, modelling efficiency, and correct application of material properties.

- **Phase 3 – Round 3: Final Evaluation**
  - Top 20 teams will receive a complex design and are required to calculate its physical properties accurately.
  - Based on correctness and value matching, the top three teams will be selected as winners.

Mode of Participation

- **Individual / Team of Two**

PRIZE POOL

- First prize – Rs.5000
- Runner up I – Rs.3000
- Runner up II – Rs.2000

Event Schedule

- **Phase 1** – Round 1: **Speed Modelling**
  - 19th February | Afternoon |Timing:10minutes
- **Phase 2** – Round 2: **Design Modelling**
  - 19th February | Afternoon |Timing:30minutes
- **Phase 3** – Round 3: **Final Evaluation**
  - 19th February | Afternoon |Timing:120minutes
