Webify – Website Development Challenge

Webify is a competitive website development event designed to bring together creative and technically skilled students to build innovative web solutions under real-time constraints. The event provides a hands-on platform for participants to showcase their web development expertise, UI/UX skills, problem-solving abilities, and teamwork in front of an expert jury panel.

The competition emphasizes **rapid development**, **innovation**, and **competitive evaluation**.

Event Highlights

- Limited number of registrations available
- Problem statements will be released 4 days prior to the event

Event Structure

Morning Session – Development & Mentoring Round

- Participants will design and develop a functional website based on their chosen problem statement.
- Expert mentoring sessions will guide teams on development strategies, UI/UX design, and best practices.
- Teams will be evaluated based on:
    - Innovation
    - Design quality
    - Functionality
    - Technical execution.
- Refreshments will be provided during the morning session.

Evening Session – Final Presentation & Judgment

- Teams will finalize and refine their websites.
- Each team will present and demonstrate their completed website before the jury panel.
- Winners will be announced based on the final evaluation.
- The decision of the jury will be final and binding.
- Refreshments will be provided during the evening session.
